1. Introduction

Effective project management requires tools and platforms that facilitate collaboration and coordination among team members. In the case of the Greener Green project, we have implemented an innovative approach using an Open Space within Nir-vana, a platform provided by Blue Room Innovation. Nir-vana is based on the premise of collaboration with diverse participants. It is a comprehensive platform that provides a collaborative digital space designed to foster creativity, efficient communication, and project management. In the context of the Greener Green project, Nir-vana has become our primary management space, facilitating seamless interaction among consortium members.

Nir-vana offers the flexibility to create both public and private workspaces. Public spaces encourage transparency and open participation, while private spaces are ideal for sensitive discussions or sharing specific information with a select group of members.

In the case of Greener Green, we have created a private space, enabling the uploading and sharing of various types of files, including PDFs, documents, photos, and reports. This has proven particularly useful for efficiently managing project documentation, ensuring that all participants have access to necessary information at any given time.

The platform allows real-time collaboration, meaning participants can work together and see updates in real-time. This has significantly improved decision-making efficiency and the implementation of corrective actions.

About your membership

Member since: Jul 6, 2022

Space members (22)

The use of Nir-vana as a management space in the Greener Green project has proven to be an effective approach to fostering collaboration, communication, and efficiency. The platform has helped create continuous interaction among consortium partners, enabling agile and effective project management. This dynamic digital environment has strengthened Greener Green project management and contributed to the achievement of its objectives.
