## 1. Introduction

---

# Luxembourg Teachers' FAIR

# LuxDidac

In Luxembourg, the teachers' union organizes a unique fair for teachers that takes place once each 2 years.

During this fair, new teaching materials and the latest findings in the field of education are on display and made available to teachers, who can then purchase them to improve their teaching methods.

This 3-day fair is interspersed with workshops and meetings, and the Minister of Education honors the fair with a visit and a speech.

## 2. Participants

---

As a result, LuxDidac is visited by many education people and mainly by teachers, which makes this fair a perfect mass audience disseminator for our project the Greener Green project.

The situation in Luxembourg is complex when it comes to schools, and elementary school depend on the Ministry, communes and local administrations.

But the multiplication of the project remains optimal in this kind of event.

FAPEL enjoyed a central booth at the fair and occupied the space for 3 days.

### 3. Key highlights

FAPEL provided teachers with reliable information about Greener Green project & displayed many information & presentations about the Greener school, offering advices and best methods to ensure the switch of their school to a respectful green attitude and to adapt the learning for primary school aged pupils.

## 4. Participant Feedback

---

Teachers had been very delighted to learn about the Greener Green project and responded positively to all FAPEL's questions and information.

Teachers come to this fair from all over Luxembourg, and we entrusted many of the persons that stopped by FAPEL's booth, to disseminate the word for green topics and to join the project for best methods & online learnings.

## 5. Conclusion

---

The "Greener Green Multiplier" event was successfully carried out by FAPEL at this special event, and we hope that it will become an annual event instead of a bi-annual one.

At the fair, we noted that the project should also have included a teaching aid, in order to present a more meaningful concept better suited to the principle of the exhibition.

The visibility of the project was assured, both for schools and for organizations active in the ecological field in the country.

## 1. Introduction

---

# Small Scale Multiplier Event II

With this small multiplier event, FAPEL tried to approach the event in a slightly more creative and element-focused way, in order to further develop this notion of ReUse-ReDuce-ReCyle and see how far we could get by focusing on this green objective.

Cofinancé par  
l'Union européenne

The European Commission's support for the production of this publication does not constitute an endorsement of the contents, which reflect the views only of the authors, and the Commission cannot be held responsible for any use which may be made of the information contained therein

## 2. Participants

---

As mentioned, we have intentionally limited ourselves to a small number of participants. 3 people and myself in order to channel the flow of information and focus solely on the ReUse-ReDuce-ReCycle theme.

The result surprised everybody, and the idea is proving very interesting. We'll be adopting a similar approach whenever the multiplier event, when time and resources allow it.

Cofinancé par  
l'Union européenne

The European Commission's support for the production of this publication does not constitute an endorsement of the contents, which reflect the views only of the authors, and the Commission cannot be held responsible for any use which may be made of the information contained therein

### 3. Key highlights

---

A main idea quickly emerged, and we set about pushing this idea further with the help of a small group for this multiplier event.

The sorting centers appealed strongly to us, and we realized that they would represent a serious partner for the environment, as they have begun to sort waste in a different way and give new life to many of the products that arrive at their recycling centers.

They innovate by creating exchange corners and organizing free distribution days and dates for certain products that are still in good working order. They even propose specific dates for repairs on household appliances or by theme and product family.

The concept seems very viable and is attracting more and more participants.

This represents an excellent green approach that we'll be disseminating through our networks or giving visibility to these sorting centers each time an event is published.

## 4. Conclusion

---

Taking a creative approach to certain challenges can pay off, and brainstorming on themes in search of innovative solutions can bring something new to the table with a relevant response to needs.

FAPEL has set up a plan to visit and negotiate with Luxembourg's recycling centers, and we'll be trying to make room for the Greener Green project with these recycling centers spread across the country.
